

GYMCUBE

EXCLUSIVE OUTDOOR GYM

SUNCUBE

YOUR OWN OUTDOOR GYM

GymCube is a stylish outdoor gym made for callisthenics exercises. Its design and colours perfectly match other SunCube products – mix them and match them to create a unique set for your perfect outdoor workout and relaxation sessions.

With GymCube in your own garden, you can do a workout anytime you want. Just put on your sports clothes and enjoy a relaxing set of exercises in your own outdoor gym!

STRENGTHEN YOUR BODY

GymCube has been created to facilitate callisthenics exercises – movements using one's body weight for resistance, thanks to which you'll improve your strength, physical condition, build your muscles, boost your concentration and body flexibility. Callisthenics exercises do not burden your joints, but rather make them stronger, when done correctly and progressively.

GYMCUBE CONSTRUCTION

The solid and durable construction of GymCube has been made of stainless steel. GymCube features properly impregnated wooden elements, such as the frame, the floor, or the oak handles, which guarantee utmost comfort and give it a classic and natural look.
